

## Explanation of basic cleaning pad

**Basic cleaning pad, black – machine pad for basic cleaning and removal of paint or other tough soiling from floors up to 350 U/min**

- ▶ Suitable for waxing and removing polymer and acrylic coatings of all types. Also removes old layers of dirt built up over an extended period of time
- ▶ Perfectly suited for extended, intensive floor cleaning
- ▶ Not recommended for very sensitive surfaces

**Basic cleaning pad, brown – machine pad for basic cleaning, removal of coatings or tough soiling and for scrubbing floors, including floors with sensitive surfaces, up to 350 rpm**

- ▶ Suitable for waxing and removing polymer and acrylic coatings of all types. Also removes old layers of dirt built up over an extended period of time Also suitable for scrubbing floors with heavy soiling.
- ▶ Less abrasive than the black pad and can thus also be used for sensitive surfaces

**Green scrubbing pad – machine pad for intensive cleaning and scrubbing of floors, also for refurbishing coatings up to 350 rpm**

- ▶ Suitable for intensive cleaning and scrubbing floors
- ▶ Very high work output
- ▶ Efficient removal of soiling on several hard floor types
- ▶ Considerably improved cleaning results on smooth surfaces compared with a brush
- ▶ Also suited for refurbishing of coatings where the pad is used to remove the top polymer layer

**Maintenance pad red – machine pad for maintenance cleaning of all coated and uncoated floors up to 800 rpm**

- ▶ For maintenance cleaning and cleaning with spray cleaning agents soft flooring types
- ▶ Specially suited for cleaning wooden floors, sports floorings, and

**Buffing pad white – machine pad for buffing, cleaning of sensitive surfaces and maintenance of coated, lightly soiled floors up to 800 rpm**

- ▶ Soft buffing pad for use in low-speed machines
